

Ermeyas Girma

London, England • ermeyasgirma72@gmail.com • <https://github.com/ermeyasgirma>

Software engineer with over 4 years of experience in full stack development, leading projects from conception to post release support. Passionate about solving complex problems and creating reliable, high-performance solutions.

Education

B.A, Computer Science, University of Cambridge

2019 – 2022

- Dissertation (Grade – First): Created a genetic programming framework in OCaml to generate congestion control algorithms based on needs of high-performance networking applications

Work Experience

Senior Software Engineer

Roku Inc - Cambridge

Aug 2024 – Present

- Built a backend-for-frontend service layer that offloaded on device processing and reduced API latency

Software Engineer

Roku Inc - Cambridge

Oct 2022 – Aug 2026

- Implemented a scheduler and payment reminder UI flow that increased resubscribes by 60%
- Reduced offers API call latency from 2-3 seconds to near zero by implementing staggered data prefetching, optimizing performance across 80+ million devices and reducing the load on servers by caching the responses on device
- Supervised and mentored intern to help create web scraping tool using selenium to detect pricing discrepancies between Roku website and the endpoints of 8+ partners

Software Engineer Intern

Rapita Systems - York

Jul 2022 – Sep 2022

- Created an automation suite to streamline manual parts of the embedded testing
- Worked with other interns to develop a compiler for a Perl-based language RTL

Full Stack Engineer - Placement

EngagementHQ - London

Feb 2021 - Mar 2021

- Designed the backend APIs in C#, leveraging Azure Blob Storage for scalable and reliable data persistence
- Created the user timeline and profile page UI for a social media platform using ReactJS, providing support for multimedia upload and user authentication

Technologies and Languages

Java, Python, BrightScript, ReactJS, OCaml, Git, Linux, Jenkins, Docker, MongoDB

Projects & Achievements

-
- **UKMT Math Challenge: 4 x Gold Medals (Junior, Intermediate, Senior, Senior Kangaroo), 1x Bronze Medal (Intermediate Olympiad)**
 - **JRaft** – Java implementation of raft consensus algorithm for distributed systems that provides fault tolerance
 - **Bully Buster** – Anti bullying ML program for X that used Bayesian classification to perform sentiment analysis
